It's a good start, but I'm going to need more detail. For example, what is the minimum and maximum forecasted revenue shortfall? How does PG&E intend to make up those revenue shortfalls? Also, which counties would currently be eligible? Also, the current ED rate has a cap (number of MWs), does this one? Why or why not?

John Hughes left me a message yesterday to discuss. I'll take him up on that ASAP.

Matt - hope this helps explain our proposal.
