Subject: RE: Some PG&E items

Hi Jane- I wonder if we could also add to the agenda an official update on PG&E's steps to respond to NTSB and set up a check in on that every 6 weeks or so?

Michelle

Subject: Some PG&E items

Michelle,

Nick let me know of some items you are interested in, specifically in the area of employee ideas/safety issues/complaints (and the process we are setting up to encourage these as well as investigate them), and data on our dig-in history.

I also heard that you may not be getting information/responses that were requested some time ago on weld-tests etc.... ---- I'd like to go over our list of commitments to make sure we aren't missing any. Previously folks may have made individual commitments within the organization that we may not know (though we are putting in place a way to make sure going forward that we capture all commitments).

Please let me know if you have some time in the next week or so, and I'll pull together info on dig-ins, our system/hotline/processes we are putting into place for our employees and our commitment list.

Thank you,

Jane
