

LR UK Training Management System

PAS55-1 2008 Awareness Course – Features and Benefits

1. Why do we have this course?

The primary objective of this course is to provide an appreciation of PAS-55-1-2008 Specification for the optimized management of physical assets through formal instruction coupled with practically based examples and delegate participation.

At the end of the course, delegates will be able to:

- Explain the basics of Asset Management systems
- Understand the background to the development of Asset Management (AM) PAS 55-1:2008, and compatibility with BS ISO management systems
- Explain what Asset Management is as defined by PAS 55-1:2008
- Understand the requirements of PAS 55-1:2008
- Understand what is required to implement AS 55-1:2008
- Describe the benefits of implementing PAS 55-1:2008

2. Target audience

- Senior managers wanting to understand the benefits of implementing PAS55-1
- Members of the asset management section and support sections, e.g. Procurement, HR, Audit, Training, Contractor Management etc. who have an impact on the way assets are managed, maintained, refurbished, renewed etc.
- PAS55-1 is a company wide standard applicable to all parts of a business responsible for the management of assets.

Client profile

- Small, medium and large organisations responsible for the management of assets eg process industries, oil and gas companies, utility businesses, rail operators etc.
