Shilpa,

Attached are some edits to your document. Once you let me know these work on your end, I'll work to finalize on my end and let you know. I also want to stress that we need to not only resolve what mailbox we submit requests into to, but also to whom the responses would be sent.

Thanks, Shilpa.

Sunil

Sunil,

The attachment has been updated to be more clear that Distribution Incidents/Audits will be handled like Transmission Incident/Audits through the Larry/Larry mailbox. Let us know if you have other suggested changes.

Thanks.

Shilpa

Sunil,

Thanks. We agree with your point that distribution incidents and audits would be handled through the Larry/Larry incident mailbox. If that is not clear in the document, we will fix it. We want to use the GRC mailbox for any questions related to our spending, plans for distribution investment/replacement, system data, analysis, etc.

We'll make that change and let us know if you have others.

Shilpa

Shilpa,

Thank you for following up on this matter. One question I already have is why certain distribution related issues are being directed into the GRC process? Why can't they be left with the general distribution process (i.e., incidents, audits, etc.)? We'll soon let you know of any other questions/comments we may have. As for forwarding this to our group, I'll take care of that once we are ready.

Thanks, Shilpa.

Sunil,

As a follow-up to our conversation last week, attached is a draft of the 'cheat sheet' for data requests submitted to PG&E. We welcome your feedback and questions.

If this works for you, how should we get this out to others at CPSD? Will you forward it to them?

Thanks.

Shilpa
