

PG&E Gas Matters Data Request Process

In an effort to ensure that data requests are handled, please use the contacts for each case listed below. PG&E is providing multiple contacts to allow coverage if the primary contact is not available. PG&E has confirmed that Valerie Malliett of CPSD will handle all requests for prior gas-related CPUC DRs. If you are uncertain where to direct your request, please contact [Redacted] for assistance.

Gas Transmission Requests

All gas transmission requests that do not fall under the cases below are to be submitted through the new mailbox, RegRelGTMattersRequests@pge.com. PG&E will continue to monitor RegRelSBRequests@pge.com while we transition to the new box. Beginning on May 1, 2012, PG&E will no longer use RegRelSBRequests mailbox.¹

Gas Recordkeeping OII (I.11-02-016) Requests

Any requests related to the Gas Records OII, or used in the Records OII should be sent directly to Lise Jordan at LHJ2@pge.com.

Class Location OII (I.11-11-009) Requests

Any requests related to the Class Location OII, or used in the Class OII should be sent directly to [Redacted] and [Redacted]

San Bruno Explosion and Fire OII (I.12-01-007) Requests

Any requests related to the San Bruno OII, or used in the SB OII (such as the Overland Audit) should be sent directly to Bruce Smith at BTS1@pge.com, [Redacted] at [Redacted] and Shilpa Ramaiya at SRRD@PGE.COM.

Distribution-related Requests (non-Incident, audit, or standards)

Distribution-related requests (not related to incidents, audits, or standards) are now being tracked under the 2014 General Rate Case. Any requests related to pre-1973 Aldyl-A pipe replacement, distribution control systems, and GIS enhancements should be sent to the GRC discovery mailbox at GRC2014Mailbox@pge.com.

Incident Reporting and GO 112-E Audits for Transmission and Distribution

Gas Operations requests concerning reportable gas incidents, reports submitted pursuant to Resolution ALJ-274, CPUC GO-112-E audits, existing standards, Safety-Related Conditions, MAOP Validation notices (excavation notifications), and 30-day construction notifications should be sent directly to [Redacted] and [Redacted] at GSIRegulatorySupportandAnalysis@exchange.pge.com

¹ Since neither CPSD nor Energy Division are a party to the PSEP case, data requests concerning PSEP will be handled through the RegRelGTMattersRequests@pge.com mailbox. If and when CPSD or Energy Division becomes a party to that PSEP case, these data request procedures will be updated.
