L132 is 52.1 miles long. For the 40 miles completed, I added together the hydrotesting and records (2.52 miles).

This slide explains the full picture that we shared at the Nov 22 hearing update.

Okay, does that mean it is 52.6 miles long or was there some portion of it that was validated by records and it is longer?

Thanks.

Michelle,

Good idea. The hydrotests for L132 will be completed this year. We completed 40 miles and will be finishing the last 12.6 miles this year. I'll leave it to the media folks to decide how they want to bring this up.

Shilpa- can you tell me, has all of Line 132 (except the part that is out of service) now been hydrotested or had the records validated for hydrotest? It would be ideal to say (in response to say a particular reporter) that all of Line 132 is now good...

Thanks.
