Subject: suggested outline for storage oir meet

Hello:

I just finished putting together this rough outline to use as referance for kicking-off our session. This is not a staff proposal in any sense; simply some ideas/questions to supplement the staff proposal that come to my mind and that hopefully can stimulate some discussion, including reviewing CESA ideas (already sent to you in slide form). The notes are in rather abbreviated/short-hand form, which should be more comprehensible with verbal commentary during the meeting.

Please forward this to others who will be on calling in. I will bring paper copies for those in attendance.

Alope Gupta
