Subject: RE: PG&E storage pilots

Alope,

Not a problem. Please indicate when you would like to set aside some time and we can provide an update.

Thanks,
Jon Eric

Just re-remembered your idea of doing an update on the storage pilots you mentioned on the side during the last meeting. I think this would be a good time to get more informed about them (I would suggest including some discussion of the CAES project as well). I will defer to Arthur in coordinating the timing and invitees on our side for this update. Thanks.

Subject: Informal brainstorming re Storage/Next Steps

Hello:

This is to re-confirm the meeting planned for 4/12 at 1:30 (in Room 4010 at CPUC) that we have verbally discussed with you earlier. The invitees include CESA and IOU representatives, along with CPUC staff. As mentioned before, the meeting is intended to be an informal, brainstorming session on Storage OIR/next steps *without* a fixed agenda or schedule. We have

reserved the afternoon to allow ample opportunities for people to discuss their ideas, but can end earlier per consensus of the attendees. A bridge will be set up for call-in.

We have at least two goals for the meeting. One is to introduce a new addition to the CPUC staff (Arthur O'Donnell) who will be dedicated to the Storage OIR. Another goal is to explore ideas for transitioning from the recently issued final staff proposal into phase 2 of the rulemaking and how to proceed with the proposed analytical framework in terms of the actual nuts & bolts of cost-effectiveness methodology, barrier resolution, evaluation of policy options, etc. There are no formal presentations scheduled; however, attendees are welcome to offer informal handouts to facilitate discussion. To allow for a productive, interactive discussion, it would be good to limit the number of attendees per organization.

Feel free to share your suggestions for topics with me in advance of the meeting.

Thanks,

Aloke Gupta
