Hi Jane,

Thank you for the update. It makes a lot of sense to me that you are seeking quantitative analysis of risk. That will be a key skill-set in the risk manager position.

Have a great week

Joyce, I wanted to thank you for interviewing for the Risk Manager position in gas operations. At this time, I've elected to go with a person who has experience in the quantitative analysis of risk.

I am hoping that you are considering our position in Standards with Karen Roth --- it is such an important area of our business, and critical to the entire operating organization. And, I think your experience and process-improvement skills will be extremely valuable. If you aren't yet convinced, please let Karen, or me, know if you would like to talk about it more.

I am travelling all next week and back to the office on 4/15.

Thank you Joyce, and have a great weekend,

Jane

Hi Jane,

Just updating you that I transmitted an application to the PG&E database last evening where I applied for the posting of Manager, Risk Register.

I am in meetings this morning, but will hopefully reach Karen Roth this afternoon. (psst-- I left Karen's cell phone number in my notebook at home today!)

I attempted to reach her PG&E office extension today by dialing 973-7000, but once again, I was diverted to the Customer Relations voicemail box, where I left a message that I would like to reach

Karen. The operator notified me that they do not divulge any telephone number for any employee, and it matters not that I work for the CPUC.

Or, my contact information is below. Thanks,

Joyce W. Steingass, PE
