Michael,

I enjoyed speaking with you just now. Jwo Cheng on my team will be in touch with you to set up a time for you to speak directly with Navigata Communications, one of the telecom providers who may be interested in bringing fiber down Highway 1 and serving the Sea Ranch community along the way.

Regards,

Dear Deanna -

I have spoken with the committee and we have a few questions and a request to learn more about the existing conduit locations (to plan and see if this would work for us irrespective of price) and then understand the process for getting a quote from you for such an effort.

Is there a good time to speak today or Monday afternoon?

Thank you.

Michael

Michael,

I enjoyed speaking with you yesterday about your challenges of getting broadband access extended to the Sea Ranch community.
