Subject: Athal Mutual Water Company

Brian:

I am hoping you can help me with this. Athal Mutual Water Company in Kern County ran out of water some time ago and they have been relying on trucked water funded through a grant from the Department of Public Health. DPH has drilled a new well for the utility and DPH's contractor is placing a new service pole tomorrow for three phase service.

This is **not** one of our utilities, but Athal has been in the press and local legislators are interested in the matter.

The word I received from DPH is that "The PG&E contact for service is [Redacted] and our [Redacted], however we have been in contact with [Reda] and PG&E will not begin their work until our meter panel is installed. On our end we are pushing the Contractor to get the service pole and meter can installed by Thursday of this week so we can then schedule PG&E."

It would be great if PG&E could have the service in place ASAP as the funds for trucked water are about to run out.

Thanks

Rami
