Subject: RE: L131-30 Pressure Restoration Request - Early Sharing

Hi Shilpa, Sunil is currently busy on a few other time-sensitive projects. It is very unlikely that we will be able to provide a response by the 23rd. I can let you know early next week when we expect to be able to provide a response.

Best,

Julie Halligan
Deputy Director,
Consumer Protection and Safety Division

Julie,

It been a little 'radio silence' from Sunil on pressure restoration – just wondering if he is around? We can make ourselves available for questions if he has any.

Just checking in.

Thanks.
Shilpa

Sunil:

I just wanted to confirm you have received the draft of our upcoming L131-30 pressure restoration

filing. I know you may have just started looking at the documentation this week, but please let me know if you are on track to provide a letter of adequacy by May 23. Let me know if you have any questions.

Thanks,

Redacted

Sunil:

This afternoon, PG&E delivered 5 copies of a CD containing the confidential supporting information for lifting operating pressure restrictions on Line 131-30. For your reference, maps of the pipeline and pressure test summary tables are attached. These will be included with the final filing. The supporting information provided on the CD is separated into two exhibits: L131-30 Mainline (Exhibit A) and L131 Branchline-Shorts (Exhibit B). These exhibits include a Pipeline Features List (PFL), MAOP Reports, Strength Test Pressure Results (STPRs) and Excavations.

As I mentioned previously, it is crucial that we restore pressure this summer, as L131 carries a peak load during warm weather. We know you are busy, but we're hopeful that you are able to provide a letter regarding adequacy no later than Wednesday, May 23 (see revised schedule below). PG&E is also available to meet in person with CPSD to discuss the filing, if needed. Please let me know if you have any questions or concerns.

Thank you,

Subject: RE: L131 Pressure Restoration Filing Timeline

Michelle,

That's fine, we'll deliver it early just so we can move on to other things. I'm told this is a short filing compared to both the Peninsula and Topock, though you can be judge when you see it.

Thanks.
Shilpa

Michelle:

Yes, it was our intent to have a CPSD letter on the adequacy by May 14. But we've adjusted our schedule based on CPSD's availability. Assuming we can get ALJ approval for the suggested procedural schedule below, our schedule would be as follows:

Pre-Filing Schedule:

Date	Action
May 10, 2012	Early sharing with CPSD
May 14, 2012	Notify parties on Service List R.11-02-019 of intent to file
May 23, 2012	CPSD provides letter on adequacy of filing**

**For any major issues, the sooner the better so we can avoid both CPSD and PG&E working over that Memorial Day weekend.

Proposed Procedural Schedule:

Date	Action
By May 31, 2012	File L131 Restoration Request
Week of June 18, 2012	Hearing
July 3, 2012	Proposed Decision
July 23, 2012	Opening Comments on PD
July 30, 2012	Reply Comments on PD
August 2, 2012	Final Decision

Since L131 is a critical line during warm weather, it is crucial that we restore pressure in early August. PG&E will ask for approval of the procedural schedule when we file our restoration request in late May. I hope these adjustments will help accommodate your busy schedule. Please let me know if you have any questions.

Thanks,

Shilpa- Our staff is completely booked the next two weeks with other assignments that can't be moved. The 15th is really the first point at which they will be able to begin review of the pre-review filing. Were you expecting that on the 5/14 date you would have CPSD letter on the adequacy of the filing or would that be later in the process? Thank you.

Michelle

Subject: L131 Pressure Restoration Filing Timeline

Sunil:

As a follow-up to our Revised Pressure Restoration Timeline for 2012 filings (attached), PG&E is on track to file a request for restoration of L131 in late-May. Due to wet weather in March, we were slightly delayed in our hydrotesting efforts. In order to get a full package of supporting information for your pre-review, we propose an early sharing of our filing to CPSD on Thursday, May 3. Our proposed filing schedule would allow for 8 business days for your review of the full package.

As shown in PG&E's 12-month timeline, we generally plan to file approximately two to three months in advance of the needed pressure restoration. Line 131 is an essential alternate supply to Milpitas and

the San Francisco Peninsula. There will be potential impact under *warmer* demand conditions if the capacity of the primary supply is diminished and L131 pressure is not restored. Deliveries to Milpitas and Hollister and downstream noncore customers are particularly at risk during warm summer weather. Because of this risk, our proposed schedule calls for a Commission decision at the August 2 Commission meeting.

PG&E's pre-filing timeline:

Date	Action
May 3, 2012	Early sharing with CPSD (8 business days for review)
May 8, 2012	Notify parties on Service List R.11-02-019 of plan to file
May 14, 2012	Incorporate feedback from CPSD and prepare/process filing

Please let me know if you have any questions.

Thanks,
