Subject: RE: CCA EE related data request

Jennifer, it appears to me that the delay to responding was do to PGE wanting to fight a policy issue that is yet to be determined. There is no other explanation for the legal interpretation that was included in PG&E's initial response. I would like to see some very specific numbers involving EE funding collected by PG&E. I don't understand why it would take a week to get that or why PG&E's response to that request involved questions of MEA's intent or a legal interpretation of a statute.

Ed and Gurbux,

I apologize that this has taken a little while, but we really are working diligently.

I am told we should be able to provide the response today.

Again sorry for the delay.

Jennifer

Jennifer and [Redacted]

I am traveling right now and have been monitoring this data request via email only so I may be missing something, but right now it appears to me that PG&E is dragging its feet on a simple data request that should have been completely fulfilled last Monday.

If PG&E is concerned about MEA's legal reading of PU Code 381.1(f), the

appropriate venue to raise that concern is through a protest to MEA's filling for funding or in response to any draft resolution Energy Division issues.

Please provide the data Gurbux is seeking without delay.

Jennifer Redact I would like to talk to you regarding PG&E's assertion that MEA is not entitled to any EE funding under 381 (f) because EE funds are not being collected through PGC. Would a call at 3: 30 work for you?
