Subject: RE: Line 300B Request to Lift Operating Pressure

Thank you for the update, Allie. We'll begin reviewing the L300B request as soon as possible. Also, in regard to the pressure restoration request for Line 131, I spoke with Shilpa and [Redacted] today to request some additional information. We hope to have our review, and letter outlining our position on the request, done soon.

Sunil,

I just wanted to give you a heads up that there is a slight delay in our schedule. PG&E will provide our L300B early showing materials during the week of June 25. I understand you are very busy, so let us know when you think you'd be able to provide a letter of adequacy as we move closer to the filing date. As of now, we are still hopeful for a early/mid-July final submittal.

Thank you,

Allie

Subject: RE: Line 300B Request to Lift Operating Pressure

Allie,

Based on our work load, which includes review of PG&E's self-reported violations, we will review PG&E's filing and provide our assessment as soon as possible. However, depending on the amount of materials needed to be reviewed in relation to the filing, and the need to balance our other work load, there should be no automatic expectation on PG&E's part that it will receive CPSD's letter of adequacy within 10 days of our receiving the filing.

Thanks, Allie.

Sunil

Subject: Line 300B Request to Lift Operating Pressure

Sunil:

PG&E is preparing to file a request for pressure restoration of Line 300B in early July. A full package of supporting information will be available for your pre-review on June 21. Our proposed schedule, which requests a letter of adequacy from CPSD 10 full business days following the early submittal, calls for a Commission decision at the September 27 Commission meeting.

PG&E's pre-filing timeline:

Date	Action
June 21, 2012	Early sharing with CPSD (10 full business days for review)
June 28, 2012	Notify parties on Service List R.11-02-019 of plan to file
July 6, 2012	CPSD provides letter of adequacy

July 12, 2012

File request

Please also note that PG&E expects to file requests for pressure restoration of Lines 1816-01 and 148 in September of this year. Let me know if you have any questions or concerns.

Thanks,

Allie
