Subject: Need to Reschedule CPUC Bird Nesting - transmission Workshop till August 2012

Panelists and interested Parties:

As you all know the CPUC was trying to schedule a workshop on transmission construction and bird nesting Issues on June 25th. However, we now need to postpone the workshop to August 2012. The appropriate staff and managers of Department of Fish and Game could not attend the workshop as scheduled for June. Given the topic of the workshop, it would not be acceptable to schedule our panel discussions without them.

Fish and Game has given me four dates – **August 9, 10, 22, or 30** for the workshop. I would like to request that the panelist review their calendars and let me know which dates would work for you. **I would appreciate a response back from each one of the panel groups by June 8th if at all possible.** After I hear from everyone, then I can follow-up with our agenda and instructions for power point presentations.

US Forest Service prospective participants – I would appreciate it very much if you all could coordinate with each other and let me know who would attend as panel members.

The CPUC appreciates your willingness to participate in the workshop and apologizes for any inconvenience resulting from rescheduling the workshop.

Best Regards

Billie Blanchard
