About the Business Council for Sustainable Energy

The Business Council for Sustainable Energy (BCSE) is a coalition of companies and trade associations from the energy efficiency, natural gas and renewable energy sectors, and also includes independent electric power producers, investor-owned utilities, public power, demand response providers, commercial end-users and environmental market service providers. Founded in 1992, the Council advocates for policies at state, national and international levels that increase the use of commercially-available clean energy technologies, products and services. The coalition's diverse business membership is united around the revitalization of our economy and creation of a secure and sustainable energy future for America. For more information, please contact Colbie Holderness (cholderness@bcse.org) or Ruth McCormick (rmccormick@bcse.org) tel: 202-785-0507.
