PG&E Witness:	Ben Campbell	Requester:	Sarah Grossman-Swenson

As used in the following questions, the terms “segment,” “pipeline segment,” and “pipeline test segment” are used synonymously, in the context of hydrostatic gas pipeline testing, to refer to the portion of a gas pipeline between the inlet and the outlet for water used in a particular hydrostatic test.

QUESTION 24

With respect to each pipeline test segment upon which a hydrostatic pressure test was performed in 2010 or 2011, please state the name of company that prepared the pipeline segment for testing.

ANSWER 24

The tests in 2011 were split between ARB and Snelson as the prime contractors responsible for preparing the pipeline for testing.

PG&E did not conduct any hydrostatic pressure tests on existing pipe in 2010.
