Subject: RE: Comr Peevey's staff Diablo Canyon Power Plant Tour (June 27, 2012)

Meredith,

I wrote a paper for my MBA program on why PG&E is a good investment. That was my conclusion anyway. PG&E's Chairperson and CEO gave a speech on June 8, 2012 so I used some of the things he said and there are some good articles in the June 2012 Fortnightly magazine.

Interesting stuff and I also like some of the new technology that PG&E is about to rollout next year. They have this thing called a synchrophasor that is going to optimize certain aspects of the smart grid, like responding to power outages. Today, the smart grid transmits information about every 2-4 seconds, as where the synchrophasor will transmit information 30 times per second. Amazing!

Thank you and have a wonderful day.

Cody,

Thanks for the tidbits and following up on the trip. I didn't know either one of those.

Meredith

Did you know that when Diablo Canyon Power Plant goes down for schedule maintenance an estimated \$5 million enters the local economy over the duration?

Did you know that upgrades to electric and gas distribution lines could create estimated 250,000-300,000 new jobs nationally per year?

Okay, okay I did not know that Damon was attending. Is he staying at the hotel? I did not complete any travel forms. I will check with Damon.

Thanks for the info and I hope you all have enjoyed my tid-bits.
