Subject: Line 131-30 Weld Certifications

Sunil

There were four welding projects identified to be completed prior to returning L-131-30 to normal pressure: (1) Hydro Test T-22, (2) PR 001, (3) PR 002 and (4) PR 003. I previously sent a thumb-drive with as-built drawings for these projects. The as-builts identify approximately 30 welds by weld number.

The attached spreadsheet has been compiled to document the pipe welds, by weld number, to return Line 131-30 to service with the certification and qualification dates for each welder and weld inspector. As you can see, two welds failed the X-ray and were successfully repaired.
