Subject: FW: Weld Inspection Bulletin

Sunil

You asked for the new transmission pipeline weld inspection form and procedures. As I explained, we are just rolling out training on the new form and procedures starting this week and expect to complete the training for all affected employees within a month.

Attached is the Weld Inspection Bulletin, the new weld inspection form (Daily Field Weld Summary Report) and training material (Daily Weld Summary Report Job Aid).

The new weld inspection procedures have been approved and will be published (become effective) upon completion of the training. Meanwhile, as soon as each employee finishes the training, they will start using the new weld inspection form.

I have scheduled a conference call for 3PM today. On the call will be Ben Campbell, Matt Stormett, [Redacted] and me. Matt and [Reda] are conducting the training and are in the best position to answer questions about the new procedures. I have asked Ben to participate in case you have any questions about the 131-30 hydrotesting itself. [Redacted] and Shilpa Ramaiya from Regulatory Relations will also be on the call in case there are any scheduling questions.

[Redacted]

Chuck

PS: I am sending this again because the attachments were corrupted on the first one.
