RE: Request for Extension of Time to Execute Contract with the California Center for Sustainable Energy under Decision 12-05-015

Dear Mr. Cherry:

This is in response to your June 27, 2012 letter requesting an extension of time to complete the execution of a contract with the California Center for Sustainable Energy (CCSE), as required by Decision 12-05-015. This contract is required to allow CCSE to perform its duties, as requested by the Commission, coordinating and implementing the statewide marketing, education, and outreach (ME&O) campaign for demand-side programs and transitioning the campaign to utilize the Energy Upgrade California brand.

Your letter represents that discussions with CCSE are well underway regarding a scope of work. The letter further represents that both parties agree that the two-week extension is needed in order to finalize the contract scope and terms. In addition, Commission staff agrees that it is appropriate to include in the contract the costs associated with the June 26, 2012 workshop on statewide ME&O held at the Commission.

Based on these understandings, I will grant a one-time extension for the requested two-week period to execute a contract. The new final deadline is July 16, 2012. Please inform the Rulemaking 09-11-014 service list that this extension has been granted, as required by Rule 16.6.

Sincerely,

/s/ ED QUAN for
Paul Clanon
Executive Director

Brian K. Cherry
