Matthew –

I have John Joseph, who worked on the Green Communities thing, which was a CPUC program to help cities to a GHG inventory, ready to talk to you. We just tried your line, when should we call back?

yours,

sid

You're probably a couple steps ahead of me on this, but I just found this report from PG&E. It appears the "success story" I'm trying to learn more about was in the Green Communities program. The successful data transfers are described on pages 6-10. My question is: how did you do it? Hoping to learn the answer ASAP.

thx again!

Matthew
