Adam,

In the attached, we are proposing to execute the green highlighted projects in the off-peak

category. Our target for off-peak is 14 MW and there is also the provision allowing 20 MW more or less, which brings the total to 34 MW. We would like to execute the three wind projects, even though it brings the total to 35 MW given it results in the lowest cost option for customers.

Please let me know your thoughts.

Thanks,

Meredith
