Subject: RE: data request - renewables for LTPP

Hi All,

I had a clarifying question from one of the other IOUs and wanted to pass along the answer to you as well. For the "RA Zone" column, I only need a value for the "NonCREZ" projects. For the projects identified in a CREZ, including the out-of-California zones, I can fill in with our simple assumptions. For the NonCREZ projects, please treat "RA Zone" as meaning TAC area, i.e. which IOU/PTO owns the transmission that the project would connect to.

Attached is the template that Kevin initially included in his data request, which now contains some additional information regarding data input parameters. These parameters should help make the data response compatible with the RPS calculator.

Hello all,

Attached is a data request that I hope will be easily coordinated with your work to update the PDSRs. Please don't hesitate to call me if you have questions or concerns about this request.

Thanks,

Kevin

Kevin Dudney
