Subject: RE: L300B Pressure Restoration Request - Early Sharing

Redact

**I have not yet received the CDs; however, I'll keep an eye out for them and let Shilpa know if I don't receive them by Wednesday. We will endeavor to complete our review as quickly as we can and if possible by PG&E's intended filing date.**

**Thank you,** Redacted

**Subject:** L300B Pressure Restoration Request - Early Sharing

Sunil:

This afternoon, PG&E delivered 5 copies of a CD containing the confidential supporting information for lifting operating pressure restrictions on Line 300B. For your reference, a map of the pipeline and pressure test summary tables are attached. These will be included with the final filing. The supporting information provided on the CD is separated into two exhibits: L300B Mainline (Exhibit A) and L300B Branchline-Shorts (Exhibit B). These exhibits include a Pipeline Features List (PFL), MAOP Reports, and Strength Test Pressure Results (STPRs).

Also included below is a complete Operator Qualifications table for the work completed on L300B. PG&E is currently conducting a formal encroachment review, and will share the results with you in August, as soon as they become available.

We know you are busy, but we are hopeful that you are able to provide a letter regarding adequacy prior to our target filing date of September 7, 2012. PG&E is available to meet in person with CPSD to discuss the filing, if needed. I will be out of the office for most of August, so please contact Shilpa Ramaiya if you have any questions or concerns.

Thank you,
