PROCUREMENT DETAIL

- 10 Procurement Summary: Total Annual Procurement is differentiated by four categories: Procurement from Contracts Executed Prior to June 1, 2010, Procurement from Category 1 Contracts, Procurement from Category 2 Contracts, Procurement from Category 3. Procurement is further differentiated based on whether the contract is 10 years in length or longer (i.e., a long-term contract). Data for this section is populated by completing the Contract Detail section below. See notes in cells B10:B13 for references to procurement definitions in the portfolio content category decision D.11-12-052.
- 11 <u>RPS Eligible Procurement by Resource Type:</u> This report must state the amount procured or projected to be procured from each resource type (D.05-07-039, Appendix A, D.06-10-050, page 47-48). This information is reported in rows 25-38 in the "Procurement Detail" tab and populated by completing the "Contract Detail" section.
- 12 Contract Detail; For each contract, enter actual and forecasted delivery data throughout the contract term. Do not assume that n expiring contract will be renegotiated.
 - > Pre-2002 Contracts : Input total annual deliveries by resource type
 - > 2002-Present years' Contracts : List contracts by name, annual deliveries (MWh), contract status, facility status, resource type, contract classification and contract length.
 - > In the "Contract Status column, "short-listed and/or under negotiation" is an option; use the short-listed option only for projects for which the LSE has a high level of confidence that a contract will be executed.

projects to which the LSE has a high feed of confidence that a contract will be executed.
"Expired Contracts: 1 Any contract expiring prior to 2020 should be listed in this section. User should identify expired contract by name and input annual deliveries (MWh) in the first year the contract is no longer delivering for the LSE (per existing contract) and in every year thereafter. For example, if a contract with annual deliveries of 10,000 MWh expired 12/31/2007, user should enter 10,000 MWh in 2008 and in every year thereafter. If this same contract expired 6/30/2007, user should enter 10,000 MWh in 2000 and 10,000 in every year thereafter. If an expired or expiring contract is re-signed, would for any other contract.

Spreadsheet user notes

> Protecting confidential data: Individual cells may be formatted black, which will serve to redact info when excel file is converted to pdf. Select cell - click on "fill color" icon - choose black. Note: Once converted to pdf, additional steps are necessary to ensure redacted data is not accessible.
