Subject: RE: AMI numbers

Chris,

Just for clarity, in #3, do you mean "total smart meters installed" or number that was on the delay list that accepted smart meters after the Feb. 1st Phase 1 decision?

I'm out of the state on vacation this week, but am cc'ing [Redacted] and [Redacted], who I'm hopeful can gather this info for you by the 9th as requested.

Cliff

All:

By Monday, July 9, could y'all provide me with the following information:

- 1) Number of customers on a delay list;
- 2) Number of customers that have affirmatively opt-ed out of AMI (by total number, percentage of delay list and percentage of total customers)
- 3) Number of customers that have ok'ed the installation of AMI (total number, percentage of delay list and percentage of total customers)
- 4) Number of customers from delay list that have not acted (total number, percentage of delay list and percentage of total customers)

I am scheduled to give a short status update to the Smart Grid Interoperability Panel Business and Policy Working Group on July 11, and the status of California opt-out is one of the things I was asked to discuss.

The data can be current as of July 1.

Thanks, and please let me know if you have any questions.

Chris
