Thanks Jane. That would be helpful, I had just started to put one together, but I am certainly not an expert at that either.

Julie

Julie, I asked a communications person to draft a letter for you to invite Chairman Hersman (I don't have experience at this...) --- so hope to get that to you in the next week. Probably with this draft, you can modify in the future to invite others...

Jane

Subject: CPUC Safety Symposium

Julie, here is my copy of the draft concept document that I believe General Hagen has previewed earlier with Jim Hall and associates. Sorry for my notes on the first page. I believe this type of symposium will be a first in the country, sponsored by the Commission.

As we discussed, I'll try to find some possible venues for the meeting, which is now calendared for January 8 after noon to January 9 at noon, including a dinner with keynote speaker Chairman Hersman from the NTSB. [Chairman Hersman is holding the time on her calendar.]

Please let me know how I can help/participate, as PG&E's rep. I believe that the work to flesh out the content of the symposium and invite speakers, will need to happen in time to get their attendance confirmed by about late-October.

Thx,
Jane
