Gabe

Attached is the research you requested specifically on the CARE discount presentation.

I am still tracking down answers to your other questions and plan to provide them this week. However, I would appreciate help from you to get an answer on question 2. I have framed those questions as follows:

If the Commission were to make changes to PG&E's rate, how big an impact would those changes have on PG&E's billing system and what would be the timing of implementing those changes:

1. Can we eliminate tiers for all residential customers without major surgery on the billing system and on the RCES format?

2. In the near term, can we change the display for the existing Res TOU rates to show the bill by TOU period with conservation discounts/surcharges to reflect the tiers?

Gabe: It would be hugely helpful if you send a mock-up of your vision. Of the things you asked about, this is potentially the largest change to our billing system.

3. Are we equipped to bill and present an un-tiered TOU rate today?

4. If we collapsed tiers, for example eliminating Tier 4, how would that appear on the bill?

5. Are we equipped to bill customers charges?

6. Is it major surgery to make changes to Baseline, either changes in the rate design from 55% to 50%, or changes in the amount covered by each tier? E.g., if Tier 2 were to be set at 101% to 250% of baseline.

Regards

[Redact]

Great speaking with you on Monday. Do you think you would be able to provide written answers to my questions today?

Thank you.
