I have held off providing an update to the assigned ALJ on this PTC.

Today, however, I finally felt it my duty to inform him that the schedule had slipped by two months and that we don't know when PG&E will be able to provide the data we need to finalize the Initial Study.

I was told by Merideth Allen that this project was "back on" but understand that you are still not authorized to provide the data we need.

Do you have any idea when you might be able to move forward with this project?

This project converges with others here and affects the CEQA unit work load.

It affects, as well, the ALJ division and planning in that division.

It would be good to have a realistic sense of the status of this project.

Thanks,

Lisa
