Re: Cast Iron Gas Main Replacement in San Francisco

Dear Mayor Lee:

I am pleased to inform you that yesterday our Consumer Protection and Safety Division received from Pacific Gas and Electric Company a detailed work plan for completion of the cast iron gas main replacement program in San Francisco.

Our staff's preliminary review indicates that PG&E's plan contains the details and specific milestones we have been seeking from the utility company. It now appears we finally have in hand a concrete plan for completing this important public safety project in a timely manner.

Our safety engineers will monitor PG&E's work, to see that it is completed in accordance with the plan we have received. We anticipate further cooperation from City Officials, as needed, to ensure the work is completed in a timely manner.

We appreciate the attention you and other City officials have given to this important public safety initiative, and look forward to a continuing cooperative relationship.

Very truly yours,

Michael R. Peevey

President

cc: Hon. Dennis Herrera, City Attorney

Joanne Hayes-White, Fire Chief, City and County of San Francisco

Naomi Kelly, City Administrator, City and County of San Francisco

Mohammed Nuru, Director, Department of Public Works, City and County of San Francisco

Nick Stravopoulos, Executive Vice President, Gas Operations, Pacific Gas and Electric Company, San Francisco

Brig. Gen. (CA) Jack Hagan, Director, Consumer Protection and Safety Division, CPUC

Frank Lindh, General Counsel, CPUC
