Subject: FW: Chairman's Ethics Council Meeting

Just got this article. Is there an investigation going on? I thought this issue was address in 2008.

Subject: FW: Chairman's Ethics Council Meeting

Tony,

Thank you for hosting this Chairman's Ethic's Council Meeting. I am a member of C&E's Compliance Champions team representing Electric Operations. A topic worth addressing at this forum today is the **perception of ethical misconduct and changes that have occurred since the recent PUC probe on PG&E ethics culture**...see this link for reference as this probe was reported by many news outlets: <http://www.sanluisobispo.com/2011/08/09/v-print/1711357/regulators-probe-allegations-against.html>

In particular:

- [Redacted] What is the status of the PUC probe of allegations of ethical misconduct by PG&E Sr Leadership [e.g., meaning have the allegations been reviewed and what was the conclusion].

Many recent Officer discussions have focused on safety; this topic on ethics goes straight to the heart of the need to have a forum for open discussions...that is why I wanted to submit it directly to you for consideration to address today.

Thank you for the good you do 😊
