Yes. Would 10:30 work?

Meredith – Do you have time this morning to talk briefly about the B&V brightsource analysis?

Here is B&V's scope of work:

The key deliverable here would be step 4 – a comprehensive overall schedule, including supporting R&D. Once that is on paper, the rest should be straightforward.

1. Review information on proposed commercial projects

2. Review information on R&D plan
3. Send questions to BrightSource, evaluate responses
4. Develop overall schedule showing projects and supporting R&D. Schedule would show key phases (e.g., transmission, permitting, finance, construction, performance validation).
5. Interview financiers (if necessary)
6. Review feasibility of schedule. Assess if steps (projects) are redundant.
7. Review feasibility of supporting business plan (does BrightSource need intermediate projects to fund the 3rd generation?)
8. Conclusions and recommendations

Yeah, give me a call and we'll figure out what we might be able to help with.

Laura,

Just got the green light from management. Starting on Monday, B&V will start their assessment of the BSE projects that are under contract w/ SCE and PG&E.

I told B&V that I want this analysis done by 10/22. Do you have time Monday morning to talk about the assistance, if any, SCE can provide B&V?

Thanks,

Paul
