**Subject: Pacific Gas and Electric Company News Release: PG&E TO  
SEND MORE THAN 150 ELECTRIC PERSONNEL TO NEW YORK TO  
HELP RESTORE POWER IN AFTERMATH OF HURRICANE SANDY**

**Pacific Gas and Electric Company issued the following release entitled:**

PG&E TO SEND MORE THAN 150 ELECTRIC PERSONNEL TO NEW  
YORK TO HELP RESTORE POWER IN AFTERMATH OF HURRICANE  
SANDY

**SAN FRANCISCO, Calif.**— Pacific Gas and Electric Company (PG&E)  
announced today that it is sending more than 150 employees to New York to  
help restore power in the aftermath of Hurricane Sandy. Crews from all over

PG&E's Northern and Central California service area will depart from Sacramento within the next couple of days.

"Providing support to other utilities throughout the nation during major natural disasters is one of the hallmarks of PG&E and the electric utility industry," said Geisha Williams, executive vice president of electric operations. "The men and women of PG&E are proud to help restore power to the victims of Hurricane Sandy, who are expected to experience widespread and long-term outages. We pulled crews from throughout our service area so that we can continue to provide safe, reliable and affordable electric service to our customers here in California while also providing critical restoration assistance in New York."

Many utility companies in the storm's projected path are calling upon extra workers and resources from across the country through the industry's Mutual Aid Network. PG&E is part of the network of U.S. utilities that call on one another to assist in power restoration efforts after major events like hurricanes, winter storms and wildfires.

PG&E has coordinated with Edison Electric Institute (EEI), the association of U.S. shareholder-owned electric companies, and the Mutual Aid Network to determine where its assistance would be most beneficial. PG&E resources will assist Con Edison in New York City and Westchester County.

PG&E will send overhead and underground maintenance and construction crews, electric first responders who determine the cause of an outage and how best to restore power, and damage assessment personnel. The utility will also send logistics support and field safety personnel.

As many as 10 states along the Eastern Seaboard -- Virginia, Maine, Maryland, Massachusetts, North Carolina, Delaware, Pennsylvania, New Jersey, New York and Connecticut, as well as Washington, DC, -- have declared states of emergency. Additionally, New Jersey, New York, Delaware and Connecticut have announced evacuations in certain parts of their states.

Pacific Gas and Electric Company, a subsidiary of PG&E Corporation (NYSE:PCG), is one of the largest combined natural gas and electric utilities in the United States. Based in San Francisco, with 20,000 employees, the company delivers some of the nation's cleanest energy to 15 million people in Northern and Central California.
