Electric Network (2012 YTD)							

Challenges Actions/Status

Endpoints

- Mass deployment nearly complete. Remaining meter installs continuing in less concentrated geographic areas.
- Field Deployment team addressing less common meter types, including NEM implementation.
- Higher than traditional number of 'Unable To-Complete' meters due to access refusals related to SmartMeter™ OpŧOut.

Electric Network

- Initial design scope of electric network is complete.
- Access weather additional electric network is necessary subject to ongoing review particularly in light of customers opting out of SmartMeter™ Program.

Endpoints

- Continuing to complete requests for optouts in a timely manner.
- Revised process is being implemented to address remaining SmartMeter™ installations and UTCs.
- Term Sheet and 2012- 2013 schedule in place with installation contractor. Remaining meters were released as of July 2, 2012.
- Broader release of NEMS-configured meter installations began July 2, 2012.
- Transformer-Rated meter forms continuing successfully. During the week of July 30, three additional meter forms (3S, 4S, 5S) were incorporated in T-rated training with 3^d party installer.

Electric Network

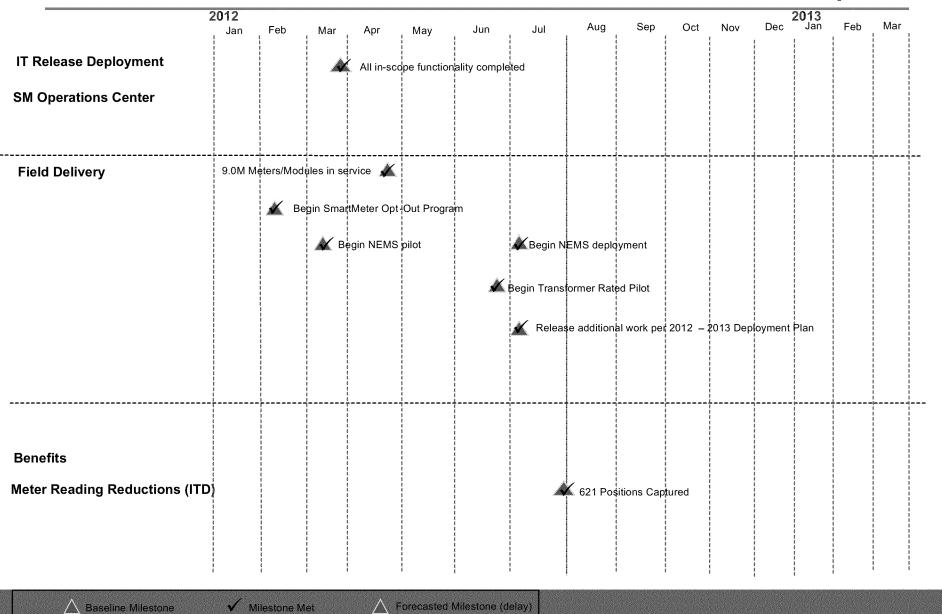

- Tracking the impact of optouts on network.
- Working with technology supplier and internal stakeholders to address network coverage in 'hard-to-reach' areas.

^{23 * 2012} capital and expense forecasts revised to align with updated 2012 - 2013 deployment schedule.

Year-to-Date Variance Explanations:

Favorable YTD capital variance (\$25.1M) primarily due to fewer meter/module installations (#3), fewer electric meter purchase s (#4), and delayed timing of initial HAN roll-

Favorable YTD expense variance (\$5.6M) primarily due to lower spending than planned in Business Operations/PMO (#7), Custome r (#10) and IT (#13).

^{*} Annual budgets revised with intent to complete project in 2013.
