Forecasts

Application 12-10-xxx

**APPLICATION OF SAN DIEGO GAS & ELECTRIC COMPANY (U 902-E)  
FOR APPROVAL OF ERRA AND CTC FORECASTS FOR 2013**

**I. INTRODUCTION**

In compliance with California Public Utilities Commission Decision (“D.”) 02-10-062, D.02-12-074 and D.04-01-050 and the Commission’s Rules of Practice and Procedure, San Diego Gas & Electric Company (“SDG&E”) hereby submits its Application for Approval of its Energy Resource Recovery Account (“ERRA”) Revenue Requirement and Competition Transition Charge (“CTC”) Revenue Requirement Forecasts for 2013 (“Application”). As discussed below and in greater detail in the supporting testimony accompanying this Application, SDG&E is seeking authority to increase ERRA and CTC rates.

Specifically, SDG&E is requesting approval of: (1) a 2013 ERRA revenue requirement of \$1,103.743 million (including franchise fees and uncollectibles); (2) a 2013 CTC revenue requirement of \$51.834 million; and (3) a new 2013 market benchmark price<sup>1</sup> for calculating the CTC and Power Charge Indifference Adjustment (“PCIA”), as well as the resulting 2013 PCIA. The 2013 ERRA and CTC forecasts are \$282.273 million and \$2.643 million higher, respectively, than the forecasts for 2012, for a combined total increase of \$284.917 million or a

---

<sup>1</sup> The market benchmark is used to calculate above or below market costs associated with SDG&E’s combined total portfolio. The method of calculating the market benchmark is set forth in D.06-07-030, modified in D.07-01-030, and most recently revised in D.11-12-018. The revised market benchmark must be based on the average of forward energy prices recorded for the entire month of October. Accordingly, SDG&E will need to amend this Application to reflect the new benchmark calculations following the release of benchmark data for October 2012 (in the past, the Energy Division provides the updated benchmark data in November and an amended application is filed approximately in the first quarter of the new year).

9.91% percent increase in current system average rates (an increase of 1.601 cents per kilowatt-hour to the system average rate).

This increase is primarily due to four factors: (1) the increase in generation in SDG&E's portfolio attributed to the expiration of California Department of Water Resources ("CDWR") contracts; (2) the increase in renewable generation costs to meet the Renewable Portfolio Standard ("RPS"); (3) the anticipated costs of implementing the California Air Resources Board's ("CARB") Cap-and-Trade Program; and (4) costs associated with the expected, reduced operation of the San Onofre Nuclear Generating Station ("SONGS"). Each individual factor is more fully described in the testimony of SDG&E witness Andrew Scates.

It should also be noted that while the expiration of the CDWR contracts contributes to the ERRR increase in 2013, this portion of the increase represents costs that were previously excluded from ERRR (CDWR contract costs are excluded from ERRR) and are now included in ERRR (replacement costs associated with expired CDWR contracts are included in ERRR). SDG&E anticipates that the decrease in CDWR contract costs will be reflected in its 2013 CDWR revenue requirement which is to be determined in a separate proceeding.<sup>2</sup> SDG&E currently expects that the CDWR costs will decrease on January 1, 2013, with a final determination before the Commission on this issue anticipated in December 2012.

In addition, SDG&E expects that the newly implemented Cap-and-Trade program will generate Greenhouse Gas ("GHG") allowance revenues. Those revenues, which will potentially offset GHG compliance costs, are currently being litigated in a separate proceeding, R.11-03-012, and are, therefore, not included herein.

---

<sup>2</sup> 2013 CDWR revenues requirements are determined in Rulemaking ("R.") 11-03-006, with an anticipated implementation date of January 1, 2013.

Further, SDG&E notes that in D.12-08-007, the Commission authorized a temporary rate increase of \$76.9 million over a 12-month period to alleviate a “trigger situation” in which SDG&E’s ERRA was undercollected.<sup>3</sup> That temporary amortization will expire not later than September 1, 2013, and thus the ERRA revenue requirement will be reduced by this amount during the forecast period.

If this Application is approved as proposed, excluding the impact of the anticipated reduction in the 2013 CDWR revenue requirement and potentially offsetting GHG allowance revenues, a typical monthly summer electric bill (based on 500 kilowatt-hours of electricity) will increase from approximately \$82.81 to \$85.92 (or 3.8 percent) for inland customers and from approximately \$91.07 to \$97.30 (or 6.8 percent) for coastal customers. A typical monthly bill for residential customers who use 1,000 kilowatt-hours per month will increase from approximately \$229.54 to \$257.38 (or 12.1 percent) for inland customers and from approximately \$239.72 to \$270.68 (or 12.9 percent) for coastal customers. SDG&E’s small commercial customers will see an increase of approximately \$29.83 on their monthly summer electric bill or 9.8 percent (based on 1,500 kWh of electricity for secondary service).<sup>4</sup> However, as noted above, it is anticipated that these increases will be mitigated by a significant decrease in the CDWR revenue requirement and the recovery of GHG allowance revenues.

## **II. BACKGROUND**

On October 29, 2001, the Commission initiated R.01-10-024 (the “Procurement OIR”) to establish ratemaking mechanisms that would enable California investor-owned electric utilities (“IOUs”) to resume purchasing electric energy, capacity, ancillary services and related hedging

---

<sup>3</sup> See also SDG&E Advice Letter 2396-E, filed August 30, 2012, indicating that SDG&E’s authorization in D.12-08-007 was supplemented by July 2012 ERRA balances, summing to \$76.9 million. This latter figure was further updated to include franchise fees and uncollectibles, totaling \$77.801 million.

<sup>4</sup> Customers’ actual bill impacts will vary with usage per month, by season and by climate zone.

instruments to fulfill their obligation to serve and meet the needs of their customers. In so doing, the Commission acknowledged that the IOUs should be provided “flexibility in transacting for energy to meet their obligation to serve their customers so that the [IOUs] can take advantage of market opportunities that result in the low and stable prices.”<sup>5</sup> The Commission also acknowledged that the IOUs desired assurance of more timely regulatory review and cost recovery for their procurement activities and costs. Such assurance ultimately came in the form of legislation, namely Assembly Bill (“AB”) 57.<sup>6</sup>

Section 454.5(d)(3) of the California Public Utilities Code (“P.U. Code”), initiated by AB 57, states that a procurement plan approved by the Commission shall accomplish, among other things, the following objectives:

Ensure timely recovery of prospective procurement costs incurred pursuant to an approved procurement plan. The commission shall establish rates based on forecasts of procurement costs adopted by the commission, actual procurement costs incurred, or combination thereof, as determined by the commission. The commission shall establish power procurement balancing accounts to track the differences between recorded revenues and costs incurred pursuant to an approved procurement plan. The commission shall review the power procurement balancing accounts, not less than semiannually, and shall adjust rates or order refunds, as necessary, to promptly amortize a balancing account, according to a schedule determined by the commission. Until January 1, 2006, the commission shall ensure that any overcollection or undercollection in the power procurement balancing account does not exceed 5 percent of the electrical corporation’s actual recorded generation revenues for the prior calendar year excluding revenues collected for the Department of Water Resources.

In D.02-10-062, the Commission established the ERRA balancing account – the power procurement balancing account required by P.U. Code § 454.5(d)(3) – by which the IOUs must

---

<sup>5</sup> D.02-10-062 at 2.

<sup>6</sup> AB 57 (Stats. 2002, Ch. 850)

track their fuel and purchased power revenues<sup>7</sup> against actual recorded costs. Consistent with P.U. Code § 454.5(d)(3), the Commission also established a semi-annual update process for fuel and purchased power forecasts and the ERRA mechanism.<sup>8</sup> The balance of ERRA was not to exceed 5% (threshold point) of the IOU's actual recorded generation revenues for the prior calendar year, excluding revenues collected for the CDWR contracts. Accordingly, D.02-10-062 (at 76, Conclusion of Law 15) established a trigger mechanism designed to avoid the 5% threshold point. Under the provisions of the trigger mechanism, IOUs are required to file expedited applications for approval to adjust rates in 60 days from the filing date when their ERRA balance reaches an undercollection or overcollection of 4% and is projected to exceed the 5% trigger. D.07-05-008, modifying D.02-10-062, added a new rule to the trigger procedures by allowing SDG&E to file an advice letter seeking to maintain rates when it expected an overcollection or undercollection above the 4% trigger to self-correct within 120 days.<sup>9</sup>

### **III. SUMMARY OF APPLICATION**

In this Application, SDG&E identifies the forecast of its load, the resources available to meet the load, fuel costs, and costs for SDG&E's various energy resources for 2013. SDG&E used these forecasts to develop its 2013 ERRA and CTC revenue requirement forecasts. SDG&E requests that the Commission grant authority to increase rates by approving as reasonable SDG&E's 2013 ERRA and CTC revenue requirement forecasts. SDG&E also asks for approval of a new 2013 market benchmark price for calculating the CTC and PCIA, as well as the resulting 2013 PCIA's.

---

<sup>7</sup> This includes revenues from utility retained generation ("URG") fuels; Qualifying Facilities ("QF"), bilateral, irrigation district and inter-utility contracts; power purchase contracts; Independent System Operator ("ISO") costs; credit/collateral; and other items as approved. #### **6. Rule 3.2 (a) (7) – statement re tax depreciation**

For financial statement purposes, depreciation of utility plant has been computed on a straight-line remaining life basis, at rates based on the estimated useful lives of plan properties. For federal income tax accrual purposes, SDG&E generally computes depreciation using the straight-line method for tax property additions prior to 1954, and liberalized depreciation, which includes Class Life and Asset Depreciation Range Systems, on tax property additions after 1954 and prior to 1981. For financial reporting and rate-fixing purposes, "flow through accounting" has been adopted for such properties. For tax property additions in years 1981 through 1986, SDG&E has computed its tax depreciation using the Accelerated Cost Recovery System. For years after 1986, SDG&E has computed its tax depreciation using the Modified Accelerated Cost Recovery Systems and, since 1982, has normalized the effects of the depreciation differences in accordance with the Economic Recovery Tax Act of 1981 and the Tax Reform Act of 1986.

#### **7. Rule 3.2 (a) (8) – proxy statement**

A copy of SDG&E's most recent proxy statement, dated April 27, 2012, as sent to all shareholders of SDG&E's parent company, Sempra Energy, was mailed to the Commission on May 2, 2012, and is incorporated herein by reference.

The rate increase reflected in this Application passes through to customers only increased costs to SDG&E for the services or commodities furnished by it.

**9. Rule 3.2 (b) – notice to state, cities and counties**

In compliance with Rule 3.2 (b) of the Commission’s Rules of Practice and Procedure, SDG&E will, within twenty days after the filing this Application, mail a notice to the State of California and to the cities and counties in its service territory and to all those persons listed in Attachment F to this Application.

In compliance with Rule 3.2 (c) of the Commission’s Rules of Practice and Procedure, SDG&E will, within twenty days after the filing of this Application, publish in newspapers of general circulation in each county in its service territory notice of this Application.

**11. Rule 3.2 (d) – bill insert notice**

In compliance with Rule 3.2 (d) of the Commission’s Rules of Practice and Procedure, SDG&E will, within 45 days after the filing of this Application, provide notice of this Application to all of its customers along with the regular bills sent to those customers that will generally describe the proposed rate changes addressed in this Application.

**VI. CONFIDENTIAL INFORMATION**

SDG&E is submitting the testimony supporting this Application in both public (redacted) and non-public (unredacted and confidential) form, consistent with SDG&E’s declarations of confidential treatment attached to each witnesses’ testimony and submitted in conformance with D.06-06-066 and D.08-04-023. In short, confidential treatment is necessary in this proceeding to avoid inappropriate disclosure of the confidential and commercially sensitive information

(pertaining to SDG&E's electric procurement resources and strategies) that SDG&E witnesses must identify to support SDG&E's ERRA and CTC revenue requirements forecasts for 2013.

### ILLUSTRATIVE IMPACT ON ELECTRIC RATES AND BILLS

If the CPUC approves SDG&E’s request, a typical non-CARE residential customer living in the inland climate zone and using 500 kilowatt-hours per month could see a monthly summer bill increase of 3.8%, or \$3.11. A typical monthly electric bill could increase from \$82.81 to \$85.92. For Direct Access (“DA”), the Utility Distribution Company (“UDC”) rate impacts on a class average basis are presented below. The percentages shown do not necessarily reflect the changes that you may see on your bill. Changes in individual bills will also depend on how much electricity each customer uses.
