Subject: Re: COC: Exhibit 35a - Distribution List change

Please include Dan Lawton on future distributions re Exh. 35. I have added him to this list.

Dan also used the multi-stage DCF. However, I think for purposes of this exhibit we would be fine with a footnote re final stage G.

I think you're the only party using a multi-stage DCF, so I don't think it makes sense to have a separate table for just one party since the idea from the commissioner is to compare the inputs of the parties for each model. Could we do this: Include your initial stage G with the DCF models of the other parties, and then footnote the final-stage G? Alternatively, we could just take the numbers in your word doc below and just add them as you show them as a footnote on the DCF page. Do either of these work for you? Let's try and resolve tomorrow. Also not sure how to handle ECAPM, since 3 parties use that. Maybe we should add a fourth model page. Any thoughts?

We have reviewed PG&E's draft and have some corrections that require only slight additional data display. Details in the attached Word doc.

Subject: COC: Exhibit 35a

Attached is a draft exhibit 35a, with text explaining the exhibit and providing a number of qualifications, and the spreadsheet behind the exhibit. We have attempted to pull the right data for the non-utility parties in order to get a start on this, but the intention now is to have each party review the form of this exhibit, and put in/review their numbers (we have DRA's in, but not the other utilities). We intend to send a draft to Ferron's adviser Colvin tomorrow just to check in with him and make sure the form is what he's expecting, so it doesn't have to be perfected by tomorrow. Please send any comments, filled-in spreadsheets back to us, and we'll consolidate into one workbook. And please send to anyone I missed.

Email or call with any questions

Thanks
