Subject: RE: Follow-up on yesterday's phone call

Hi Mark,

Per your request, I've attached 4 documents for your use (plus the BV SOW).

The first attachment is a complete listing of all our 2012 projects (strength testing, Pipe replacement, valve automation and ILI). We are on track to complete all of the work as planned, which includes 185 miles of strength testing, 39 miles of pipe replacement, 46 valve automations and 78 miles of ILI retrofits.

The second attachment is a summary list of the strength testing work still on-going in the field. Some of these are wrapping up in the next several days.

The third attachment is a complete listing of our Pipe and Valve work still on-going in the field.

The fourth attachment includes the name and phone number of each PG&E Construction Manager, directions, and maps for all active PSEP projects.

Notes:

1/ please provide the CM with 24 hour notice prior to a site visit...the CM's are very busy and in some cases cover several projects.

2/ please comply with all site safety requirements – including JHA review, sign in and proper PPE.

3/ please ask that the CM escort your employees while on site.

4/ we have a Director of Construction (Pierre Bigras) and 4 Regional CM's...they have been copied above. Should you not successfully reach a CM, please contact one of the Regional CM's, Pierre or me to answer any questions.

My understanding is your team of 3 to 4 employees will likely be visiting our active construction sites beginning late this week.

The intent of your visits will be to witness the work, ask some questions about welder qualifications, OQ certifications, etc.

For the CM's use I've also included the BV SOW ("PPSAP"), which was recently approved by the CPUC.

Brian McDonald, P.E.
Director

Gas Operations PSEP PMO

Subject: Follow-up on yesterday's phone call

Brian,

Good afternoon. Yesterday during our call you stated that you would send us the schedule of activities with addresses and site contacts (draft format). I have not received this. In the mean time, can you please send me at least 3 site locations with contract information, preferable the strength test activities.

Thank you

Sincerely,
Mark
