Subject: PG&E Response to October 5, 2012 Letter re: Kern Power Plant June 19, 2012
Incident

Confidential Subject to PU Code 583

Mr. Parkes,

In response to the October 5, 2012 letter from Valerie Beck to Tom Allen, please find attached 1) PG&E's root cause analysis for the Kern Power Plant incident, which outlines corrective actions identified for PG&E; and 2) a root cause analysis prepared by Cleveland Wrecking Company and URS related to the incident.

Please note that while the corrective actions identified in the first document focus on enhancements to PG&E's contractor procurement and review process, we have also begun consultation with an independent entity to conduct an assessment of PG&E's contractor oversight practices. Furthermore, PG&E has embarked on an enterprise-wide contractor safety program, which could identify additional measures and process improvements.

Please feel free to contact me if you have further questions.

Thanks,
