Subject: Energy Division Data Request Re: Public Utilities Code Section 910

Dear All,

CA Public Utilities Code Section 910 requires the California Public Utilities Commission to prepare a written report on the costs and cost savings of the renewable portfolio standard (RPS) program as well as distributed and renewable generation. This report is required to be submitted to the policy and fiscal committees of the Legislature by February 1<sup>st</sup> of each year.

In support of this effort, the Energy Division has prepared a data request to obtain information about 2011 RPS and distributed generation program costs and cost savings. This data request is attached.

Given the expedited nature of this project, we would appreciate your response to this data request by Monday, December 10, 2012. If you have any questions or need further clarification, please do not hesitate to contact me.

Thanks in advance for your assistance.

Best regards,

**Michele Kito**
