Subject: Follow-up from yesterday's meeting

Colette

To clarify one aspect of our discussion yesterday, PG&E initially asked for a memorandum account on December 2, 2010 (Advice 3171-G), but that was denied (without prejudice) on May 5, 2011 (Resolution G-3453). In denying our request, the Commission said it would evaluate the request in the Gas Safety OIR (R.11-02-019) which is where PSEP is housed. We filed for a MA in this proceeding the same day – May 2011. That motion has been pending for 18 months without the ALJ or Commission considering it. The Bushey PD specifically denies including any expenses incurred prior to the effective date of the decision (see pp. 84-85 of the decision.)

Here is a link to a recent Commission decision on SCE's GRC. It was voted out on November 29, 2012. In it, the Commission authorizes SCE to establish a SONGS memo account that tracks costs back to January 1, 2012.

I hope this is helpful.

Thanks again for the time yesterday.
