Subject: Back up data on solar numbers

A story in Bloomberg over the weekend had the following quote in it:

Passing Costs

Southern California Edison will transfer about \$400 million in annual costs to people without solar systems when the state hits the cap, David Song, a spokesman, said in an interview. PG&E Corp. (PCG)'s Pacific Gas & Electric, the state's biggest utility, will pass on about \$700 million a year, according to Denny Boyles, a spokesman, for a total of \$1.3 billion from the three utilities.

Can both of you provide me with the back up information your companies used to make the calculations? Thank.

Edward Randolph | Director, Energy Division California Public Utilities Commission 505 Van Ness Avenue, Room 4004 San Francisco, CA, 94102 415-703-2083 | <u>edward.randolph@cpuc.ca.gov</u>
