PG&E Data Request No.:	ED_013		
PG&E File Name:	SM CSI_DR_ED_013-Q01		
Request Date:	December 5, 2012	Requester DR No.:	12/5/12
Date Sent:	December 6, 2012	Requesting Party:	Energy Division
PG&E Witness:	N/A	Requester:	Aloke Gupta

QUESTION 1

We need to confirm the latest statistics on your AMI deployment. Please provide the following ASAP today or early tomorrow.

1. # of smart meters (electric, gas) installed by 12/1/12.
2. # of meters remaining to be installed (and expected completion date).
3. # of opt-outs requested by 12/1/12.

ANSWER 1

The current requested statistics on PG&E's SmartMeter™ Program are listed below.

1. As of November 30, 2012, PG&E has installed 9,500,230 SmartMeters™ under the SmartMeter™ Program (including 364,272 retrofits). This includes 5,242,555 electric SmartMeters™ and 4,257,677 gas SmartMeter™ modules. Please note that these amounts do not include 2011 and 2012 new business SmartMeters™ funded by PG&E's General Rate Case.
2. PG&E plans to effectively complete deployment under its SmartMeter™ Program by 2014. The forecast of remaining meters to be installed is dependent, however, on various factors, such as customer opposition to SmartMeter™ technology and the outcome of the Phase 2 Opt-Out proceeding (e.g., whether community opt-out will be permitted and whether current Opt-Out Program fees will be modified). PG&E anticipates exchanging approximately 400,000 to 600,000 SmartMeters™ in this timeframe.
3. As of November 30, 2012, 33,043 residential customers have enrolled in PG&E's SmartMeter™ Opt-Out Program.
