Hi Adam,

I've raised the question with team and have asked for their response by tomorrow.

Hope that works.

Thanks!
Meredith

Hi Meredith,

Just wanted to follow up with our call from yesterday.

Judith Ikle had asked me about the process for verifying RECs associated with on-site generation, to ensure there isn't double-counting, etc. I know that WREGIS tracks this, and the CEC must deem the source an eligible renewable resource, etc.

But Judith, and now Ed Randolph, have both asked if I could provide some background on how these RECs associated with generation consumed on-site are verified since there's no transmission of energy involved that can be measured.

Let me know if you can assist. I may also call the CEC to get their input.

Thanks,
Adam
