Subject: RE: Back up data on solar numbers

Brian, Ed: attached is a slide that describes the calculation for PG&E. This supports the \$700 million estimate that we included in our opening and reply comments on the NEM Cap PD.

Please let me know if you have any questions.

Thanks,

David

A story in Bloomberg over the weekend had the following quote in it:

#### Passing Costs

Southern California Edison will transfer about \$400 million in annual costs to people without solar systems when the state hits the cap, David Song, a spokesman, said in an interview. PG&E Corp. (PCG)'s Pacific Gas & Electric, the state's biggest utility, will pass on about \$700 million a year, according to Denny Boyles, a spokesman, for a total of \$1.3 billion from the three utilities.

Can both of you provide me with the back up information your companies used to make the calculations? Thank.
