Subject: FW: Decision on BV

FYI. Looks like we will be transitioning out immediately.

Subject: Decision on BV

Des,

Mike Meko followed up with John Conway and Mike Jones for Randy this morning. We have agreed to transition off of BV and put them on “hold” status in our system. The “hold” status will require a due diligence review (starting with Sourcing Director and myself) if someone in the company wants to use them in the future.

Plans for current work:

Helms U3 lamination inspection –

This work is completed and the PO will be closed once we ensure all payments have been completed

Kern lead and asbestos abatement inspection –

We are at a good transition point where any additional work can be sourced to an alternate supplier

Kern fatality root cause investigation–

They started this work October last year and they are completing their work in one to two weeks. We will have them complete the work then will close out this PO.

We will be contacting BV this afternoon with the above information. Please let me know if you have any concerns and/or require additional information.

Gun
