Advice 3862-E-B
(Pacific Gas and Electric Company) D U39 E)

Public Utilities Commission of the State of California

Subject: Second Supplemental Filing for Purchase and Sale Agreement for Procurement of Renewable Energy Credits Between TransAlta Corporation and Pacific Gas and Electric Company

Introduction

Pacific Gas and Electric Company ("PG&E") submits to the California Public Utilities Commission ("Commission" or "CPUC") a second supplemental filing for Advice 3862-E ("Advice Letter"), dated June 16, 2011. The Advice Letter, PG&E submitted a purchase and sales agreement dated September 15, 2009, amended by the first amendment thereto (collectively, the "PSA") between TransAlta Corporation ("TransAlta") and PG&E for a term of four years. Under the PSA, TransAlta will sell Renewable Energy Credits ("RECs") created by generating renewable portfolio standard ("RPS")-eligible electric power at TransAlta's Summerview 2 wind generation facility in Alberta, Canada (the "Project") to PG&E. The annual production is expected to be 475,000 RECs. The Advice Letter is pending resolution by the Commission.

On October 12, 2012, PG&E filed supplemental Advice Letter 3862-E-A to obtain CPUC approval of the PSA as amended by the September 28, 2012 amendment to the PSA. The September 28, 2012 amendment to the PSA reduced the term of the PSA from four years to three years.

The purpose of the second supplement is to further the term of the contract and obtain CPUC approval of the PSA as amended by both the September 28, 2012 amendment and the January 2, 2013 amendment to the PSA (the "Amended PSA"). The Amended PSA reduces the term of the PSA to two years. PG&E continues to seek Commission approval of the PSA and its subsequent amendments.

¹ Supplements to Advice Letters are authorized by General Order ("GO") 96-B, General Rules Section 7.5.1. Due to the limited scope of PG&E's supplemental information, this filing should not re-open the protest period or the effective date of the advice letter.

The Amended PSA Contains a Reduced Delivery Term

Because of the delay in obtaining Commission approval for the PSA, TransAlta contacted PG&E and requested a further reduction in delivery term to allow TransAlta the option to sell the Project's 2012 vintage REC to a third party. PG&E found it reasonable to release the 2012 RECs to TransAlta and executed the Amended PSA on January 2, 2013.

The Amended PSA reduces the delivery term of the PSA to two years. PG&E will purchase 175,000 – 210,000 RECs per year that are produced by the Project during the 2 year period January 1, 2013 to December 31, 2014. The January 2, 2013 Amendment does not otherwise modify the PSA and is attached as Confidential Appendix A.

Procurement from the Amended PSA Counts in Full toward RPS Compliance

Procurement from the Amended PSA will count in full toward procurement requirements in effect under Senate Bill (SB) 21X transactions signed before June 1, 2010, "count in full" if the following conditions are met:

- (1) The renewable energy resource was eligible under the rules in effect at the date the contract was executed;
- (2) For an electrical generation contract, the contract has been approved by the commission, even if that approval occurs after June 1, 2010; and
- (3) Any contract amendments or modifications occurring after June 1, 2010, do not increase the nameplate capacity or expected quantities of annual generation, or substitute a different renewable resource. The duration of the contract may be extended if the original contract specified a procurement commitment of 15 or more years.²

Commission Decision ("D.") 12-06-038 establishes the guidance regarding pre-June 1, 2010 procurement that is subsequently amended, modified, or extended. The Commission determines that the original transaction should "count in full" toward procurement requirements in effect prior to SB 21X and that only incremental procurement from the amended, modified or extended contract should be subject to applicable rules on portfolio balance, use of short-term contracts, and excess procurement.³

Upon Commission approval of the Amended PSA, procurement from the Amended PSA will count in full toward RPS procurement requirements and is fully "bankable." As detailed in the Advice Letter, the Project is a renewable resource under the rules in effect as of the date the original agreement was signed, October 29, 2009. Subsequent amendments to the PSA signed after June 1, 2010 do not increase the capacity or expected quantities of annual

³ See D.12-06-038 at 33-34 and Conclusion of Law 13-14.

⁴ See Advice Letter at 13.

generation, substitute the renewable energy resources generating RECs, or extend the duration of the PSA. Thus, if approved by the Commission, procurement from the Amended PSA is not subject to rules established by the Commission on portfolio balance, long term contracting, and excess procurement under the 33% RPS program.

Superseded Energy Delivery Requirements do not Apply to the Amended PSA

SB 2 1X eliminated the requirement that energy be delivered to California in order to be RPS eligible.⁵ In Advice Letter 3862-E, PG&E explained that PG&E would associate RECs from the Project with imports into California as a precautionary measure until implementation of SB 2 1X.⁶ Subsequent to the Advice Letter, the Commission and California Energy Commission (“CEC”) implemented the removal of the deliverability requirement. Specifically, D.11-12-052 determined that (1) the requirement for delivery; (2) the Commission’s authority to require demonstration that a RPS procurement transaction meets the delivery requirement ceases to exist December 10, 2011. The CEC RPS Eligibility Guidebook was also modified to remove requirements that state RECs are delivered to California, the CEC will no longer verify energy deliveries for purposes of the RPS beginning on or after January 1, 2011. Because the Amended PSA is for the purchase of RECs produced by the Project commencing January 1, 2013 and the removal of the RPS deliverability requirement was implemented by the Commission and CEC, PG&E is required to associate RECs from the Project with imported energy.

Request for Commission Approval

PG&E requests that the Commission approve this Advice Letter and this supplemental filing with an additional finding that:

8. Finds that pursuant to SB 2 1X and D.11-12-052, PG&E is not required to demonstrate that the RECs associated with the Project are delivered to California with imported energy for the purposes of determining RPS eligibility.

Effective Date:

PG&E requests that this Tier 3 Supplemental Advice Letter become effective concurrent with Advice Letter 3862-E and Supplemental Advice Letter 3862-E-A.

⁵ SB 2 (1x) eliminates the delivery requirement by amending Public Resources Code Section 25471 to remove reference to delivery.

⁶ Advice Letter at 4, 12 (explaining the inapplicability of deliverability under SB 2 1X and that PG&E will associate the Project’s RECs with imported energy “out of an abundance of caution” until SB 2 1X implementation).

⁷ D.11-12-052 at 15 and Conclusion of Law 1-2.

⁸ CEC Renewable Portfolio Standard Eligibility Guidebook at 5 (August 2012 Sixth Edition).

**DECLARATION OF RICHARD MIRAM
SEEKING CONFIDENTIAL TREATMENT
FOR CERTAIN DATA AND INFORMATION CONTAINED IN
ADVICE LETTER 3862-E-B
(PACIFIC GAS AND ELECTRIC COMPANY - U 39 E)**

I, Rich Miram, declare:

1. I am presently employed by Pacific Gas and Electric Company ("PG&E") and have been an employee at PG&E since 1973. My current title is Principal within PG&E's Energy Procurement organization. In this position, my responsibilities include negotiating power purchase agreements with counterparties in the business of producing electric energy. In carrying out these responsibilities, I have acquired knowledge of PG&E's contracts with numerous counterparties and have also gained knowledge of the operations of electricity sellers in general. Through this experience, I have become familiar with the type of information that would affect the negotiating positions of electricity sellers with respect to price and other terms, as well as with the type of information that such sellers consider confidential and proprietary.

2. Based on my knowledge and experience, and in accordance with Decision ("D.") 08-04-023 and the August 22, 2006, "Administrative Law Judge's Ruling Clarifying Interim Procedures for Complying with Decision 06-06-066," I make this declaration seeking confidential treatment of Appendix A to Supplemental Advice Letter 3862-E-B submitted on January 30, 2013. By this Supplemental Advice Letter, PG&E is seeking this Commission's approval of an amendment to the power purchase agreement that PG&E has executed with TransAlta Corporation.

3. Attached to this declaration is a matrix identifying the data and information for which PG&E is seeking confidential treatment. The matrix specifies that the material PG&E is seeking to protect constitutes the particular type of data and information listed in Appendix 1 of

D.06-06-066 and Appendix C of D.08-04-023 (the "IOU Matrix"), or constitutes information that should be protected under Public Utilities Code § 583 and General Order 66-C. The matrix also specifies the category or categories in the IOU Matrix to which the data and information corresponds, and why confidential protection is justified. Finally, the matrix specifies that: (1) PG&E is complying with the limitations specified in the IOU Matrix for that type of data or information; (2) the information is not already public; and (3) the data cannot be aggregated, redacted, summarized or otherwise protected in a way that allows partial disclosure. By this reference, I am incorporating into this declaration all of the explanatory text in the attached matrix.

I declare under penalty of perjury, under the laws of the State of California that, to the best of my knowledge, the foregoing is true and correct. Executed on January 30, 2013, at San Francisco, California.

Rich Miram
