This sounds semi-positive. At least the right people should be in the same room.

I'll be in touch tmrw when we know more.

Just spoke to Redacted Bldg Eng. He'll meet us at the CPUC bldg. tomorrow at 8:00. There are two meter sets at that location. A 3M at 5psig and another meter at standard pressure. If they installed new high efficiency boilers they might be having a pressure problem and will have to go to elevated pressure. I'll let you know.
