Subject: RE: CONFIDENTIAL: PG&E's Response to Energy Division's Data Request Re PU Code 910-911: Responses 1B, 1C, 1D, 1E, 1F, 2a, 2b, 2c, 8, 9, and 10

If you define "projects" as the folks working out in the field physically working on the transmission projects (e.g. design, construction), then I would say that all 14 FTEs are working on "interconnection" related items (e.g. working on studies and implementing the results of the studies), not physical projects. Does that provide the clarity you're looking for? Please let me know if you are looking for some more detail around the transmission FTE total.

Thank you,

Redacted

One clarifying question regarding the 14 FTEs work that on "General Office that work on RPS transmission related projects" – do you mean transmission related "projects" or "interconnections".

Thanks

Sean

Sean –

We are working on gathering this information and expect to be able to provide at least an approximate FTE, if not more detailed information to you by Thursday.

Thank you,

Lauren,

Quick follow up question on PG&E's response to Question 1B. Assuming that the 39.22 Energy Procurement FTEs identified in PG&E's response does not include staff working in PG&E's transmission dept, can PG&E provide the number of employees and FTEs working on transmission that worked on the RPS program in 2011. If you only have the FTE number that is fine.

Please respond by Thursday, January 24.

Thanks much
