Subject: RE: AB 1900 OIR (biomethane injection)

Laura,

Here is the latest draft OIR by the way; sorry for not getting it to you sooner but the system was rejecting the format earlier:

<http://docs.cpuc.ca.gov/SearchRes.aspx?docformat=ALL&DocID=47876202>

The draft OIR is not that different from the draft I sent to you a couple of weeks ago, and in fact it's the same regarding the most critical part (preliminary info due from utilities within 30 days of OIR).

Thanks, and talk to you at 1:30.

-Franz

Of course!

My number is 973-8663

Laura,

Is there any way to call you instead since you would be in one room already? We could try to join parties via our phone system but that hasn't worked out so well in the past for technical reasons.

As to documents, we won't be presenting anything either.

Thanks,

Franz

I like your call idea! We will gather here, in my office, and then we could call you at the number of your designation.

We don't have any documents though, not yet – do you?

Send me a number.

Thanks Franz.

Laura,

They are indeed scarce—I checked and there is nothing available anywhere unless we resort to the cafeteria, which is not my preference in case we discuss anything confidential. So I was actually thinking a call was in order (with e-documents?) and I'd meet separately with Sempra, then have a joint meeting later this month. Would you prefer otherwise?

Thanks,

Franz

We thought we'd come see you – is that ok?

Redacted, and me.

If you prefer a call, we can do that too. I know that meeting rooms are scarce at the PUC!

Laura,

Great, is there a dial in number you want to set up?

To be clear the purpose of this call would be a status update as to the non-ARB/OEHHA portion of AB1900, i.e., pipeline safety and integrity and how PG&E would set the standard for biomethane producers to inject their gas onto PG&E's system.

Thanks,
Franz

How about 1:30 tomorrow? I can definitely make it then and I'll see who else can join me from here.

Laura,

Due to issues Sempra is having on their end, I am thinking that it's probably better to meet individually with you. Could you establish a good time/date other than tomorrow morning (Thursday)? Tomorrow early in the afternoon works for me. I would prefer if you were there, so if it has to be next week that's okay too.

Thanks,
Franz

Franz

I am not available Friday but I'm looping in [Redacted] and [Redacted] as they may be!

Just tell us what time works best for you.

Thanks

Laura

Laura,

Sorry, I was waiting on Sempra, which took a while to get back to me with a good time, but how is Friday looking for you? Would you have a preferred time?

Thanks,

Franz

Hi Franz – did you set anything up yet?

This week is pretty good for us!

Hope all is well.

Laura

Laura,

As you know, the OIR for the AB 1900 bill (biomethane injection) is about to begin, though it's been held again and likely won't actually begin until Feb. 13. Nevertheless, I'd like to hold another IOU-CPUC meeting to talk about the progress made in addressing the non-human-health portion of AB1900. What are some good times/dates for you?

Also, as a reminder, even though the OIR has not yet officially been issued due to a last-minute hold again, there will almost surely be a requirement for the IOUs to respond to the questions in the OIR. The latest public draft of the OIR is at <http://docs.cpuc.ca.gov/PublishedDocs/Published/G000/M045/K080/45080048.PDF>

Thanks,

Franz
